

# The Spirit of Sagamore

By

Malcolm J Cooper

Department of Physics, University of Warwick, Coventry CV47AL, UK

Sagamore conferences began in 1964 under the auspices of the American Army Materials Research Centre, Watertown at a location in upper New York State called Sagamore. They rapidly assumed a focus on methods of studying charge and spin density. Sessions were informal, copying the style of Gordon conferences.

This short introductory talk is intended to set the stage for the conference.
